

**VPM's
DR VN BRIMS, Thane
Programme: MMS (2021-23)
First Semester Examination February 2023**

Course Name:	Business Statistics	Course Code	C103
Roll No.		Marks	60
Total No. of Questions	6	Duration	3 Hours
Total No. of printed pages		Date	03-03-2023

Course Outcome Statements:

- CO1.** DEFINE the basic terminologies related to the concepts taught through the syllabus of Business Statistics
CO2. EXPLAIN the concepts related to Data Representation, Central Tendency, Dispersion, Skewness, kurtosis, Probability, Probability Distribution, Sampling Distribution, Estimation, Hypothesis, and the various Statistical Tests.
CO3. MAKE USE OF data to calculate the value of various statistical measures to solve a business problem
CO4. EXAMINE the value of statistical findings to analyse the various business problem
CO5. PRAISE the results of statistical tests for taking a business decision.

Instructions: - For solving Q1 a, Q2 a and Q2 b refer the tables attached with the question paper.			Marks	BL	CO																																			
Q. No 1 (All Questions are Compulsory)																																								
Q. No.		Questions																																						
Q. 1		Case/Case-let Study (500-800 words)																																						
	a.	<p>Four varieties of rice are cultivated on plots of land. Scientist claims that there is no significant difference in production of these varieties</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th>Plots</th> <th>Variety A</th> <th>Variety B</th> <th>Variety C</th> <th>Variety D</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>13</td> <td>12</td> <td>12</td> <td>11</td> </tr> <tr> <td>2</td> <td>11</td> <td>10</td> <td>11</td> <td>13</td> </tr> <tr> <td>3</td> <td>12</td> <td>10</td> <td>11</td> <td>9</td> </tr> <tr> <td>4</td> <td>13</td> <td>11</td> <td>12</td> <td>10</td> </tr> <tr> <td>5</td> <td>14</td> <td>11</td> <td>13</td> <td>10</td> </tr> <tr> <td>6</td> <td>13</td> <td>10</td> <td>14</td> <td>8</td> </tr> </tbody> </table> <p>Analyse the data given in the table and verify the claim at 5 % Significance level</p>	Plots	Variety A	Variety B	Variety C	Variety D	1	13	12	12	11	2	11	10	11	13	3	12	10	11	9	4	13	11	12	10	5	14	11	13	10	6	13	10	14	8	6	Level 4	CO4

3	35																																							
4	60																																							
5	60																																							
6	48																																							

	b.	The company XYZ manufacturing bulbs hypothesizes that the life of its bulbs less than 145 hours with a known standard deviation of 21 hours. A random sample of 25 bulbs gave a mean life of 130 hours. Decide whether this claim is true a 0.05 level of significance	6	Level 5	CO5																						
Q. 3		Answer Any one from the following.																									
	a.	Analyse the given data and calculate the standard deviation, Variance & Coefficient of Variation i) 114,125, 112, 119, 117,173,181,102,127,144 ii) 164,168,169,172,173,173,178,178,147,188	6	Level 4	CO4																						
	b	Four cards are drawn successively with replacement from a well shuffled pack of 52 cards. Analyse the give data for following conditions 1) All four are diamonds 2) None is diamond	6	Level 4	CO4																						
Q. 4		Answer Any two from the following.																									
	a.	A company manufactures different types of electric appliances. It has been using the radio for advertising its products. The following table shows the amount of radio time (X, in minutes) and the number of electrical appliances sold (Y) over the last seven years. Develop the regression equation of Y on X. <table border="1" data-bbox="268 831 794 904"> <tbody> <tr> <td>X</td> <td>25</td> <td>18</td> <td>32</td> <td>21</td> <td>35</td> <td>28</td> <td>30</td> </tr> <tr> <td>Y</td> <td>16</td> <td>11</td> <td>20</td> <td>15</td> <td>26</td> <td>32</td> <td>20</td> </tr> </tbody> </table>	X	25	18	32	21	35	28	30	Y	16	11	20	15	26	32	20	6	Level 3	CO3						
X	25	18	32	21	35	28	30																				
Y	16	11	20	15	26	32	20																				
	b	Sales and advertng cost of the retail company is given in the below table. Make use of the data and calculate correlation between them <table border="1" data-bbox="268 972 635 1456"> <thead> <tr> <th>Sales(Y)</th> <th>Advertng Cost(X)</th> </tr> </thead> <tbody> <tr><td>100</td><td>22</td></tr> <tr><td>100</td><td>26</td></tr> <tr><td>110</td><td>28</td></tr> <tr><td>120</td><td>32</td></tr> <tr><td>130</td><td>32</td></tr> <tr><td>130</td><td>30</td></tr> <tr><td>130</td><td>30</td></tr> <tr><td>120</td><td>28</td></tr> <tr><td>120</td><td>26</td></tr> <tr><td>100</td><td>26</td></tr> </tbody> </table>	Sales(Y)	Advertng Cost(X)	100	22	100	26	110	28	120	32	130	32	130	30	130	30	120	28	120	26	100	26	6	Level 3	CO3

	c.	A Student is taking a multiple choice examination in which each question has five possible answers, exactly one of which is correct. If the student knows the answer he select correct answer, otherwise he select one answer at a random from the five possible answers. Suppose that student knows 55% of the questions. If student get correct answer to a question Solve for the conditions that he knows the answer?	6	Level 3	CO3																						
Q. 5		Answer Any two from the following.																									
	a.	Explain with the help of suitable example concept of central tendency	6	Level 2	CO2																						
	b	Explain type 1 and type 2 errors	6	Level 2	CO2																						
	c.	Explain the concept of normal distribution curve	6	Level 2	CO2																						
Q. 6		Answer Any two from the following.																									
	a.	Define the conditions applicable for Binomial distribution	6	Level 1	CO1																						
	b	What is correlation analysis	6	Level 1	CO1																						
	c.	What are different methods of sampling	6	Level 1	CO1
